## POWER DELIVERY SYSTEMS

Power delivery systems provide an easy, cost-effective way of facilitating the inclusion of LED lighting elements and digital enhancements into retail displays. By being integrated directly into a new system or retrofitted into existing displays, they can greatly extend the lifespan of merchandising equipment without impacting its overall aesthetic.

Our in-house electrical engineers work alongside industry specialists to develop power delivery systems that are optimised to meet the rapidly changing needs of our clients. See more information at www.unibox.co.uk
